

COLD TEMPERATURE AIRPORTS

Effective 04 September 2026

Airports are listed by state with ICAO identifier, airport name, temperature limit in C and affected segment(s). The temperature limit is indicated on airport instrument approach procedures (IAPs) next to the snowflake symbol ❄ in the United States Terminal Procedures Publication (TPP). The segments are listed for operators using the Individual Segments(s) Method.

Additional information and procedures can be found in the Aeronautical Information Manual (AIM), Paragraph 7-3-4, Cold Temperature Airports and on the Aeronautical Information Service's Terminal Procedures Basic Search page under Additional Resources, Current Edition: Legends & General Information.

Additional Information

The following military airfields meet the criteria to be identified as a Cold Temperature Airport using the FAA cold temperature model. USAF, USA, USM, USN and USCG are not required to adhere to the procedures found in the AIM at these airfields. This information is applicable to FAA authorized operators operating into these airfields.

Identifier	Airport Name	Temperature	Initial	Intermediate	Final	Missed
KGTB	Wheeler-Sack AAF	-29C		X		
PAEI	Eielson AFB	-37C		X		X
PAFB	Ladd AAF	-33C		X		X
